ABOUT ME

A motivated and curious Computer Science and Engineering (Data Science) student with a strong interest in learning new technologies and exploring innovative ideas. I enjoy taking on new challenges, developing practical solutions, and continuously improving my knowledge through hands-on experiences. I am a responsible, adaptable, and enthusiastic learner who aims to grow both personally and professionally while contributing positively to team projects and real-world applications.

EDUCATION

Ballari Institute of Technology and Management

B.E. in Computer Science and Engineering (Data Science)

CGPA: 9.03

2025 – 2029

Ballari, India

TECHNICAL SKILLS

Programming:	Python, C, C++
Libraries/Frameworks:	NumPy
Tools:	Jupyter Notebook, VS Code, Turbo C

PROJECTS

Hospital Patient Management System

December 2025

- Developed a queue-based patient management system using structures, pointers, dynamic memory allocation, and linked lists in C.
- Implemented a menu-driven interface enabling users to seamlessly add, display, and treat patients.

Online Auction System

April 2026

- Developed a menu-driven Python application for item listing, bidder registration, bid placement, and automatic winner selection using dictionaries, lists, functions, and conditional logic.

CERTIFICATIONS

- Internship in C

ACHIEVEMENTS

- 2nd Place – Debate Competition
